

Life-skills learning. For your school.

Figured is an alternative school for the human and practical skills of growing up. We work from a specific student-development need and the provision your school already leads.

A CONNECTED BRIEF / IN PREPARATION

Figured Foundations.

Thinking clearly, working with others and taking ownership through connected practical challenges. The proposed family format is six 90-minute sessions for 4-6 learners; a school adaptation has separately agreed timing, group size and staffing.

A FOCUSED SCHOOL PROGRAMME / IN PREPARATION

Speak, Connect & Lead.

Explain a view, listen, work through disagreement and contribute to a shared task. Proposed six 60-minute sessions for ages 9-12, with a cohort of up to 24 and a lead facilitator plus assistant, subject to readiness and school agreement.

LEARNING AROUND THE LEARNER

Parent and educator workshops.

Your Child and AI, Beyond Constant Reminding, and Teaching Through Practice are in preparation. Agree a focused scope and relevant expertise for your community.

A clear brief. Useful follow-through.

1 / Establish fit	Agree a cohort, a specific capability and why practical learning would add value.
2 / Define delivery	Confirm the named programme, facilitator and assistant, review and rehearsal, dates, room, access needs and school liaison.
3 / Support participation	Plan thinking time, written or visual contributions, group roles and an appropriate way to pause or seek help.
4 / Review the work	Use specific observed actions, support used, learner work and teacher transfer prompts. Keep later classroom reports distinct from session observations.
5 / Agree the next step	A written scope confirms deliverables, total fees, responsibilities and terms. A school review informs a continuation decision.

An example from the learning

Before a group chooses between two plans, each learner explains one priority and checks another person's reason. A teacher can reuse the prompt: "Whose priority have we not understood yet?"
